Personal Summary

Over the past 5 years, I have gained experience working on a variety of hardware systems and have had the chance to work with a wide-range of software development languages, both front-end and back-end. Due to this exposure, it has allowed me to develop a diverse tech skillset. Having worked in roles that are also customer facing, I am an excellent verbal and written communicator. I am always looking for ways to challenge myself, usually by working on interesting problems where I can get stuck in and make an impact.
